HUMAN CAPITAL CAPABILITIES

KNOW FIRST. ACT FIRST.

HUMAN CAPITAL SOLUTIONS

OVERVIEW - OSINT FOR HUMAN CAPITAL

Worldstack's OSINT capabilities give recruitment and search firms a very real edge. From understanding candidate behaviour, through to providing placement opportunities with clients and prospects, we make sure you have the intelligence that puts you in front.

SKILLSET DEMAND

Our OSINT solutions provide reports on changes in peoples job titles, who's hiring, and even tells you explicitly what skills are most in demand - all in near real-time. You can stay ahead of the trends, and anticipate movements in the market with *real* accuracy.

LEAD

Those unicorn candidates that command attention and get offers every time they interview are rare. There are behavioural clues when they're thinking about greener pastures - sometimes even before they know.

GENERATION

Gain the intelligence on which candidates are open to move, how willing they will be to listen, and how likely they are to accept offers.

Providence from Worldstack can also show you the movements of people from inside your clients and prospects, and let you know the exact nature of any changes. Where there's change, there's opportunity to backfill positions.

CANDIDATE VALIDATION

We can remove risk considerably from your final placements. With Worldstack's **Providence** solution we provide visibility far beyond traditional background checks.

Indicator	Relevance	Source	Summary	Link
1	Low	Facebook	[REDACTED] checked into [REDACTED]	https://bit.ly/2fd233k
2	Medium	LinkedIn	Good seeing you last night at [REDACTED]	https://bit.ly/ttydSI4
