1	Low	Twitter	'I love how easy paypal is to dodge'	https://bit.ly/2fd233k
2	Medium	Facebook	'Managed to convince my bank that...'	https://bit.ly/ttydSl4

UNDERWRITING

The ability to understand the risk an organisation or person presents based on information found online translates to better and more accurate pricing and adjustments to premiums. With Worldstack, you gain a deeper and more accurate profile to make decisions.

FRAUD DETECTION

Our [Providence](#) platform helps detect fraudulent claims by analysing accessible data and the activities of claimants. This presents a dashboard with findings that can be drilled-down on to understand the exact nature of any fraud and the record of the findings.

CLAIMS PROCESSING

Imagine having clear insight as to the nature and position of a claimant through the automatic gathering of information about any known associates and activities prior to a claims approval. With Worldtack, you have informed decision-making in your hands.

FRAUD INVESTIGATIONS

In cases of suspected fraud, our solutions gather pertinent information about the people and their known associates with any potential links to fraud perpetration. Our machine learning platforms and Analyst team sift through seas of data to provide clear criteria for decision-making about the likelihood and seriousness of purported fraud cases.
